ALTERNATE HEALTH CORP.
NOTES TO RECONCILIATION OF IFRS TO NON-IFRS FINANCIAL MEASURES

USE OF NON-IFRS FINANCIAL INFORMATION

The Company occasionally utilizes financial measures not calculated in accordance with generally accepted accounting principles in Canada (“IFRS”) in order to provide investors with an alternative method for assessing our operating results in a manner that enables investors to more thoroughly evaluate our financial performance. We also believe these Non-IFRS measures provide investors with a more informed baseline for modeling Alternate Health’s future financial performance.

Management uses these Non-IFRS financial measures to make operational and investment decisions, to evaluate the Company's performance, to forecast and to determine compensation. Further, management utilizes these performance measures for purposes of comparison with its business plan and individual operating budgets and allocation of resources. We believe that our investors should have access to, and that we are obligated to provide, the same set of tools that we use in analyzing our results. These Non-IFRS measures should be considered in addition to results prepared in accordance with IFRS, but should not be considered a substitute for or superior to IFRS results. We have provided definitions below for certain Non-IFRS financial measures, together with an explanation of why management uses these measures and why management believes that these Non-IFRS financial measures are useful to investors. In addition, we have provided tables to reconcile the Non-IFRS financial measures utilized to IFRS financial measures.

Adjusted Non-IFRS Measures

Our Non-IFRS measures adjust IFRS Net income, Net income per share - diluted, and EBITDA for non-cash stock-based compensation expense for employees and partners and fees incurred for listing the Company's shares on the Over the Counter ("OTC") market exchange in the United States.

Adjusted EBITDA

Alternate Health uses adjusted EBITDA as a means to assess the overall financial performance of its business without the effects of interest, taxes, depreciation, amortization, non-cash share based compensation and non-recurring expenses associated with listing the Company's stock on the OTC as these items may distort the analysis of certain business trends and hinder comparative analysis with other healthcare businesses competing in our markets.
